Necessary Preferences Statistics

Please see our [Cookie Policy](#) or visit our [Privacy Dashboard](#) for more information.

Allow Selected

Allow All

This form allows you to generate randomized sequences of integers. The randomness comes from atmospheric noise, which for many purposes is better than the pseudo-random number algorithms typically used in computer programs.

Part 1: Sequence Boundaries

Smallest value (limit -1,000,000,000)

Largest value (limit +1,000,000,000)

Format in column(s)

The length of the sequence (the largest minus the smallest value plus 1) can be no greater than 10,000.

Part 2: Go!

Be patient! It may take a little while to generate your sequence...

Get Sequence

Reset Form

Switch to Advanced Mode

Note: A randomized sequence does not contain duplicates (the numbers are like raffle tickets drawn from a hat). There is also the [Integer Generator](#) which generates the numbers independently of each other (like rolls of a die) and where each number can occur more than once.
