Fast
UniTO

AN ACADEMIC
DISSECTION BASED
ANATOMY COURSE
DESIGNED FOR
OBGYN TRAINEES

UniTO FAST

is a structured academic certification program for gynecological anatomy created and developed at the University of Turin, Italy.

The **program** has been **tailored for trainees** and is based on an innovative educational model of **female anatomy** leading to the "fast" acquisition of the anatomical knowledge and practical dissection skills on cadaver for surgical application.

It includes **3 building blocks** for pelvic anatomy:

- Reinterpretation of known anatomy
- Simplification of surgical anatomy
- Application of anatomical surgery

The program includes **3 modules**:

- "knowledge" (theory)
- "knowledge as recognition" (practice)
- "knowledge acquisition" (testing)

Sponsored by:

Dicofarm group

Johnson & Johnson

ENDOTECNICA

Supported by:

TORINO LIFE FOR LE GENT

Società Italiana Endoscopia Ginecologica

FONDAZIONE ONLUS

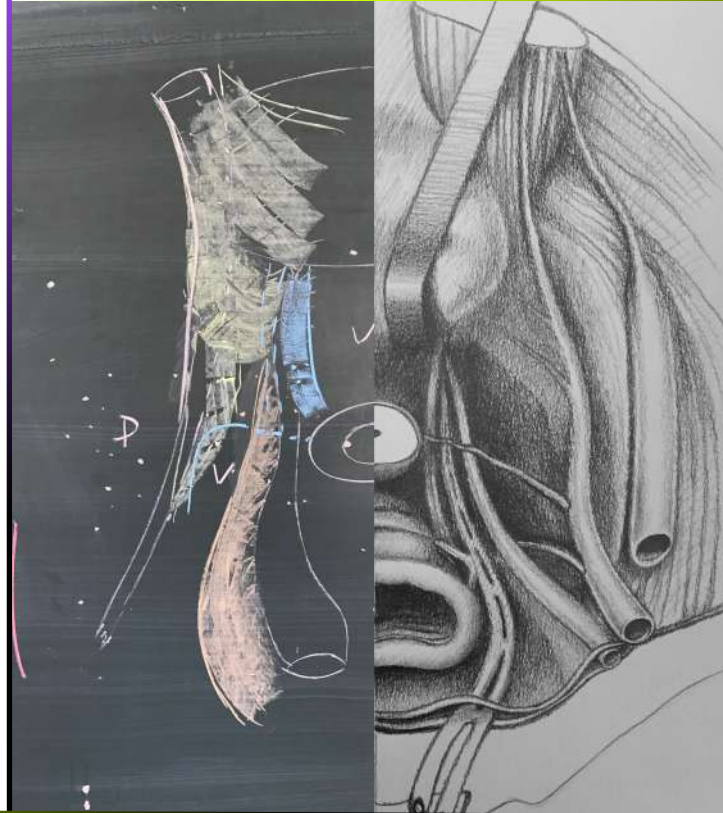

A project of:

University of Turin

Course venue: Anatomical Institutes Building
C.so Massimo d' Azeglio 52, Turin (Italy)

In collaboration with:

Female

Anatomical

Surgery

for Trainees

Presidents:

Chiara Benedetto
Alessandro Vercelli

Director:

Stefano Cosma

AIAD President:

Maurizio Catalani

Director of the Specialty School:

Luca Marozio

Tutors:

Stefano Cosma
Domenico Ferraioli
Luca Fuso
Luca Grasso
Gabriele Lanzo
Leonardo Micheletti
Francesco Moro
Annalisa Tancredi

Faculty:

Simone Arolfo
Marina Maria Boido
Massimiliano Mistrangelo
Marco Oderda
Paolo Petruzzelli

Technical support:

Vittorio Monasterolo

Scientific secretariat:

Sabina Rollo
Loredana Salton
Annamaria Tavella

Info & registration: 011 0267950; segreteria@hdcons.it

KNOWLEDGE

KNOWLEDGE AS RECOGNITION

KNOWLEDGE ACQUISITION

1st day

Below the pelvis

THEORY

- Surgical terminology for vulvar cancer treatment
- The Scarpa's triangle
- The classical model of pelvic anatomy
- A fascial reinterpretation of the classical female pelvic surgical anatomy: seeing things from a different angle

PRACTICE ON CADAVER

- Vulvar anatomy
- Inguinofemoral anatomy
- The classical model of pelvic anatomy: dissection of spaces and structures

TESTING

- "Make the puzzle"

2nd day

The pelvis

THEORY

- The Parietal and Visceral compartments: suspension and support systems of viscera
- The Vascular and Neural compartments: vascular and neural crossroads of the body

PRACTICE ON CADAVER

- The fascial compartmentalization
- The Parietal and Vascular compartments: dissection of their anatomical structures
- The Neural and Visceral compartments: dissection of their anatomical structures
- Anatomy of the main mono/bi/tri/full-compartmental gynecological procedures

TESTING

- "Freaking Shapes"

3rd day

Above the pelvis

THEORY

- Going beyond the pelvis

PRACTICE ON CADAVER

- Anatomic knowledge to explore the upper abdomen in gynecologic oncology

TESTING

- "Which came first: the chicken or the egg?"
